

Advanced Aquaculture Nutrition, Feeds, and Feeding of Aquatic Organisms

Course Number: ZOOLOGY 570 (3 credits)

Offered: Spring 2011

Meets: Lectures and Discussion Groups TBA

Instructor: Dr. Jesse Trushenski, Fisheries & Illinois Aquaculture Center

Lecture Topics Include: nutritional biology of fishes and crustaceans, bioenergetics, nutrients and their functions, nutrient requirements and feed formulation, feedstuffs and feed manufacturing.

Discussion Groups: Each week, recent publications in aquaculture nutrition will be critically discussed in terms of design, interpretation, and ramifications of results.
